

Remove one of the water bottles from the restroom. As you can see, the liquid inside the bottle is a bit questionable to drink. However, all but one person must drink this liquid.

To make it safer and to ease your anxiety, use the provided survival water purifier to filter the liquid. When you are ready, pour the filtered liquid into the small dixie cups and you all must drink together.

Make sure in your video, you show the liquid in your cups and you all drinking at the same time.

For every person who chooses to drink the liquid in its raw unpurified state, you will earn 100 bonus points.
